

848: Lotus Notes Domino 8 Building the Infrastructure

1

DJ, the Domino administrator, has configured Domino to use DB2 as a datastore for certain databases on a server. He is creating a replica on another server in the domain of one of the DB2 databases. What file extension will he use on the new replica?

- A. db2
- B. ndb
- C. nsf
- D. ntf

2

Which of the following are the default names for the DB2 instance, database and schema?

- A. DB2, Domino, Domino
- B. NSF, Domino, DomDB2
- C. Domino, NSFDB2, NDDDB2
- D. SYSCTR, Domino, DB2AccServ

3

Directory assistance in Lotus Domino 8 enables you to specify when a secondary directory must only be used for authentication. This provides which of the following features?

- A. This blocks email from being forwarded to adjacent domains.
- B. This avoids NAMELookups to reduce the number of "Ambiguous Name" dialog boxes.
- C. This help you validate your choice of host name for receiving authentication requests.
- D. This scans group member lists to ensure that each member exists in an available directory that is configured in directory assistance.

4

What is the name of the shared resource that lets you define a DB2 view of Notes data?

- A. DB2 Access view (DAV)
- B. Notes Access view (NAV)
- C. Lotus Access View (LAV)
- D. Domino Object view (DOV)

5

The Domino administrator has created a response file for a silent server installation. What parameter must be run on the server to utilize this response file?

- A. setup.exe -silent -options c:\temp\install.txt
- B. nsetup.exe -silent -options c:\temp\install.txt
- C. setup.exe -response -options c:\temp\install.txt
- D. silent.exe -response -options c:\temp\install.txt

6

Utilizing Domino 8, Julie is integrating WebSphere Portal with the integration wizard. She wishes to enable single sign-on and the Common PIM Portlet. Which of the following is required for this to function?

- A. The servers must be on the same physical network.
- B. Users must utilize their shortname for login credentials.
- C. The Lotus Domino server must not be configured for clustering.
- D. Security features must be enabled on the Websphere Portal server to use Domino LDAP.

7

Satchel, the Domino administrator, is attempting to implement design note compression on the resource database. He is unable to see the property selection to enable this feature. Which of the following is preventing him from seeing this selection in the database properties box?

- A. He is not manager of the database.
- B. He has not deferred index creation.
- C. He has not enabled the new Domino 8 ODS.
- D. He does not have the designer client installed on his workstation.

8

DDM Operating System probes can monitor which of the following?

- A. CPU, disc, network and SMTP
- B. CPU, disc, memory and network
- C. CPU, folders, network and SMTP
- D. CPU, folders, memory and network

9

Domino Domain Monitoring (DDM) enhanced events may contain events from one of the following?

- A. Events generated by a Domino event generator
- B. Events that are reported to the Domino server console
- C. Events that occur on the local Domino Administrator client
- D. Events not generated by agents or that do not apply to databases

10

Mike, the Domino administrator, has configured Rooms and Resources across a cluster. When multiple replicas of the resource database exist in the cluster, where is processing handled if all the servers are available?

- A. The user's home server
- B. The resource's home server
- C. The first cluster server available
- D. The server closest to the physical location of the resource

11

Jefferey wishes to view the name of a Domino cluster, some statistics for the current server, and the names of all the cluster servers. What is the server console command that he should issue?

- A. Show stats
- B. Show cluster
- C. Show configuration
- D. Tell cluster report

12

The Domino Console connects to the Controller over what default port?

- A. 80
- B. 1352
- C. 1533
- D. 2055

13

Chaz, the Domino administrator, has noticed performance issues when LDAP searches are being performed against the Domino Directory. Which of the following is the best offered solution to improve performance?

- A. Extend the LDAP schema to add new attributes
- B. Create a full text index of the Domino Directory
- C. Configure Directory Assistance to load all users into memory in advance
- D. Delete the (\$LDAP) view in the Domino Directory and let it rebuild automatically

14

The DDM Web Configuration probe will evaluate which of the following document types?

- A. Web Server Configurations, Web Programs document, and the Program document
- B. Server Document, the Connections document, and the File Identifications document
- C. Server document, the Internet Site document, and the Web Server Configurations document
- D. Internet Site document, Web Server Configurations document and the File Identifications document

15

While deploying a new Domino server, you wish to move a database to a new server for certain users, while leaving the original database in place for others. Which of the following is the best solution to accomplish this?

- A. Visit each affected user and manually modify their bookmarks.
- B. Choose the Administrator tool for database move notification to the affected users.
- C. Create Redirect and specify the users that should be redirected to the new database.
- D. Create or update a desktop policy with the new local replicas for the affected users.

16

Sal set up a mail routing event generator. What does this generator provide?

- A. It loads all mail tasks on the server
- B. It creates entries in the EVLOG.NSF database
- C. It tests connectivity to all other mail servers in the domain
- D. It sends a mail trace message to a specified user's mail server

17

Automatic Diagnostic Collection stores reports in Fault Report documents. In what database are these documents stored?

- A. DDM.nsf
- B. Reports.nsf
- C. In the log.nsf of each server
- D. A mail-in database defined by the administrator
