

849: Lotus Notes Domino 8 Managing Servers & Users

1

Breanna has registered a roaming user. By default, where are the user's files stored?

- A. On all servers
- B. On all mail servers
- C. On the user's mail server
- D. On the user's file server

2

Liz wishes to disable transaction logging for a particular database on a server with transaction logging enabled. However, she cannot see the Advanced Database Properties to do so. What is the cause of this?

- A. She is not in the Administrators field on the server document.
- B. She cannot selectively turn off transaction logging for individual databases.
- C. She must add the notes.ini line to the server DisableTransLog=name of database.
- D. Transaction logging can only be disabled per document, not for an entire database.

3

In which of the following databases does the Server Health Monitor store its health reports?

- A. shmon.nsf
- B. dommon.nsf
- C. statrep.nsf
- D. serverhm.nsf

4

Which task performs the operation of obtaining diagnostic data after server and client crashes?

- A. Fault Analyzer
- B. Fault Recovery
- C. Event Handler Notification
- D. Automatic Diagnostic Collection

5

S/MIME mail messages being sent to the Internet are having message disclaimers applied by the server. However, recipients are unable to unencrypt or read the body. What step(s) should the Domino administrator take to ensure that the messages can be read by the Internet recipients?

- A. Configure the S/MIME certificate inside the policy applying the message disclaimer.
- B. Enable the flag in the policy document to skip adding disclaimers on S/MIME messages.
- C. Configure the new S/MIME task on the Domino server to read and apply the disclaimers.
- D. Disable the server from applying message disclaimers and enable them to be added by the client.

6

Which of the following is enabled when the administrator specifies the maximum number of Smart Upgrade attempts by specifying a value in the field "Maximum Concurrent Downloads"?

- A. Smart Upgrade Limits
- B. Smart Upgrade Maximum
- C. Smart Upgrade Interval
- D. Smart Upgrade Governor

7

You want to restrict simple search to enhance server performance by preventing users from searching databases on a server that do not have full-text search enabled. In which of the following locations is this configured?

- A. The server document
- B. The server notes.ini
- C. The server configuration document
- D. The advanced properties of each database

8

New and updated features and plug-ins for the Lotus Notes client are downloaded from which of the following?

- A. Client sites
- B. Updates sites
- C. Smart Upgrade sites
- D. Provisioning client

9

When installing the Notes client, what documents are created by default that contain communication, Java applet security and port information?

- A. Account
- B. Location
- C. Connection
- D. Certificate

10

The Smart Upgrade function can be configured to adjust an installation between just the Notes client or all clients automatically. Where is the parameter read to make this automatic adjustment?

- A. The Notes client notes.ini file
- B. The Domino server notes.ini file that holds the Smart Upgrade database
- C. The server document for the server that holds the Smart Upgrade database
- D. The server configuration document for the server that holds the Smart Upgrade database

11

Which of the following mail features is not available in the basic version of the Lotus Notes client?

- A. Message recall
- B. Attention indicators
- C. Choice of preview pane location
- D. Reply to all without attachments

12

Smart Upgrade failover utilizes what search order?

- A. By document link in the Notes client
- B. By server name and hard-coded path to the Smart Upgrade database
- C. By database replica ID and database name in the home server cluster
- D. By notes.ini variable on the client listing all servers in the domain the Smart Upgrade database may be found on

13

Shawn has modified a DDM probe document. What must be performed for this probe change to become active immediately?

- A. Run the console command "reload probes".
- B. Run the console command "restart probes".
- C. Do nothing as modified probe documents take effect immediately.
- D. Probes are automatically reloaded based on the configuration time specified in DDM.nsf.

14

The condensed Directory Catalog is created from which template?

- A. dircat.ntf
- B. dircat5.ntf
- C. dircat7.ntf
- D. catalog.ntf

15

Jordan, the Domino administrator, has configured replication probes in DDM but nothing is being reported into the DDM database. What could be the possible cause of this?

- A. Replication is up to date and was attempted, but was considered Null.
- B. Replication was attempted but the destination server could not be reached for the probe check.
- C. Replication was performed and numerous changes were made to the source database and none to the spokes.
- D. Replication was attempted but the source server did not have proper access to replicate so replication was skipped.

16

Cherelle, the Domino administrator, is launching Server Health Monitoring for the first time. What tasks are monitored by default for each server?

- A. HTTP, SMTP, Adminp and the Amgr
- B. The core server task, HTTP, SMTP and Adminp
- C. No tasks until the administrator configures the monitoring for each server
- D. All tasks currently running when the Server Health Monitor is first launched

17

Which of the following is not available for modification with the install manifest?

- A. Sametime
- B. Activities
- C. IBM Productivity Tools
- D. Composite application editor
